PROFESSIONAL SUMMARY

Results-driven Software Engineer, QA Specialist, and IT Consultant with 3+ years of hands-on experience engineering scalable web platforms, automated testing frameworks, and cloud-backed systems. Finalist in BSc Information Technology with demonstrated expertise in React, TypeScript, Node.js, and relational databases (MySQL, PostgreSQL). Proven track record in API and end-to-end testing (Postman, Jest), CI/CD integration, and cloud environments (AWS/Azure). Passionate about building reliable digital products, implementing secure AI agent workflows (LangChain, RAG), and delivering high-impact solutions.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (exposure) · Azure (exposure) · Cloud resource provisioning · Performance monitoring · Docker · CI/CD Pipelines	Application Testing & QA: Manual & Automated Testing · Postman (API) · Jira (bug tracking) · UAT · Load Testing · TDD
Frontend Development: React · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · Tailwind CSS · Bootstrap · Vite	Backend & Databases: Node.js · ASP.NET Core / C# · MySQL · PostgreSQL · Firebase · REST APIs · Data Migration · PHP
Architecture & Diagramming: System design · Technical documentation · Workflow mapping · Architecture repositories · Roadmaps	AI / ML & Innovation: LangChain · RAG · Agent Architectures · Generative AI (SAP certified) · n8n Automation
UI/UX & Prototyping: UI testing & iteration · User research · Feedback collection · Responsive design · Accessibility	IT Support & Docs: First-line user support · Technical writing · User guides · CCNA Cybersecurity · Wireshark

WORK EXPERIENCE

Senior Software Quality Assurance Engineer · Annex Technologies Limited	Jan 2024 – Present Kenya · Hybrid
- Performed API testing using Postman and validated backend functionality with SQL queries, ensuring data integrity and system compliance. - Assisted in automation testing, reducing manual testing effort and contributing to CI/CD quality pipelines. - Provided first-line application support to internal users, escalating complex incidents through proper channels. - Documented workflows, test procedures, and QA processes to support knowledge retention and operational continuity.	
Software Testing Intern · Kiwami Tech Solutions	Aug 2025 – Present Nairobi, Kenya · Part-time
- Designed and maintained reusable test case management components, execution workflow interfaces, and real-time dashboards to support performance monitoring. - Collaborated with backend engineers to validate REST API integrations, verifying accurate display of live test execution results, logs, and dashboards. - Performed frontend testing, debugging, and defect reporting; participated in Agile sprints to ensure quality across iterative releases.	
Co-Founder & Lead Engineer · RemboGlow	Aug 2025 – Present Nairobi, Kenya
- Co-founded and engineered a beauty-tech digital platform owning architecture design, frontend development, deployment, and monitoring of pilot solutions. - Conducted user research and feedback collection to iterate UI/UX and align product development with user needs. - Documented learnings, case studies, and operational processes to support knowledge transfer and future scaling.	
Software Engineer · Tari Africa Platforms	Jan 2025 – Jun 2025 Nairobi, Kenya · Contract
- Designed and managed relational databases in MySQL, supporting data entry, cleanup, and migration tasks. - Built real-time dashboards centralizing compliance and financial reporting supporting performance monitoring responsibilities. - Maintained configuration and integration documentation ensuring compliance and knowledge continuity. - Managed Agile sprint delivery during peak transaction periods, contributing to parallel project execution.	

Freelance IT Consultant & Software Developer · Malila Tech Consultancies

Apr 2023 – Oct 2025
Kenya · Full-time

- Provided remote and on-site IT support, handling low-to-medium complexity technical issues and escalating complex incidents appropriately.
- Supported SMEs in data migration from manual to digital systems, improving data accuracy and cutting processing time by up to 40%.
- Advised clients on cybersecurity best practices, password policies, phishing awareness, and endpoint protection.
- Delivered digital literacy workshops for community groups and NGOs, building capacity in IT tools and web technologies.

Quality Assurance Attaché · Kiwami Tech Solutions

Jun 2025 – Aug 2025
Nairobi, Kenya

- Designed manual test cases for a mobile banking app and created automated test scripts, cutting QA task time by 35%.
- Identified and documented critical bugs in mobile UI flows, preventing a flawed release to 10,000+ users.
- Participated in sprint reviews, presenting QA findings and contributing to technology roadmap and release decisions.

KEY PROJECTS

E-Foleni — Queue-Free Booking & Scheduling Platform Co-founded and engineered an M-Pesa native booking platform replacing manual lines. Built multi-person slot scheduling logic, automated STK Push payment integrations, and fast mobile web views. Saved an average of 42 minutes per visitor across 120,000+ bookings with 99.9% uptime. efoleni.co.ke	React · TS · Tailwind · M-Pesa Daraja · Dashboards
Kiwami TestCloud Production cloud-based software testing platform. Built full frontend with real-time dashboards, secure auth flows, and API integration.	React · TS · Vite
RemboGlow Beauty-tech e-commerce platform — co-founded and engineered end-to-end, including architecture design, pilot deployment, and user research iteration.	React · Node · Postgres
Tari Digital Nexus Full-stack platform integrating KRA eTIMS and M-Pesa for SME digital tax compliance — included data migration, dashboard build, and compliance documentation.	Node · PHP · MySQL
Skymed Life Healthcare web application with load-tested infrastructure supporting 500+ concurrent users and workflow documentation.	React · Node · Load Testing

EDUCATION

BSc Information Technology · Zetech University

Jan 2023 – Dec 2025 (Expected Graduation: Nov 2026) · Finalist

Diploma — Computer Software Engineering · Zetech University

Jan 2022 – Nov 2023 · Completed

Software Development Certification · Power Learn Project (PLP Africa)

Mar 2025 – Aug 2025 · Completed

LICENSES & CERTIFICATIONS

CCNA: Enterprise Networking, Security & Automation	• Cybersecurity Fundamentals — Q1 Masterclass
The Complete Cyber Security Course — Udemy	• Generative AI — SAP
Hashgraph Developer — Hedera / Attendance	• Software Engineering — Power Learn Africa
.NET Fundamentals — Microsoft Student Learn	• Microsoft Office Suite — Microsoft

LANGUAGES

English — Full Professional Proficiency	Swahili — Native / Full Professional Proficiency
